

BMC AMI Ops z/OS

Learning Path

BMC AMI Ops for z/OS® Learning Track: System Programmers

**WBT**
Web-based Training

**CERT**
Certification

**ILT**
Instructor-led Classroom/Online

**ASP**
Assisted Self Paced

Recommended for: System Programmers

Product versions: 6.4

The BMC AMI Ops Monitoring solution provides the ability to monitor and manage the performance and availability of your IBM z/OS and z/OS Unix environments. It allows operators and system programmers to identify problems quickly, no matter where they appear in your z/OS environment and track an exhaustive array of critical metrics.

The BMC AMI Ops Monitor *for z/OS* product (formerly known as the MainView *for z/OS* product) is a system-management application that provides a wide range of services and functions to help you manage the performance of your entire system.
